IDENTIFIERS	*Maryland

ABSTRACT

Data on degrees awarded by Maryland public and private colleges and universities for fiscal years 1971-1982 are presented. Twelve-year trends in total degrees awarded by institution are presented, along with 6-year trends (1977-1982) in degrees awarded for each program at each institution in Maryland. In addition to the detailed statistical tables, a brief narrative summary is provided. Highlights include the following: there has been continued steady growth in the number of lower-division certificates awarded in recent years; associate degree production at community colleges increased during the first part of the 1970s and then stabilized; bachelor's degrees increased by one-third at the University of Maryland's University College, while the public colleges and private colleges experienced slightly more than 20 percent growth in bachelor's degree production; at the master's level, the state institutions increased degree production by 47 percent, and the private institutions more than doubled in degree production during 1971-1982; at the doctoral level, there has been relative stability at both the University of Maryland and Johns Hopkins University; and first-professional degree production at the University of Maryland increased during the early 1970s and stabilized since 1977. This report presents data on degrees awarded by Maryland public and independent institutions of higher education from fiscal year 1971 through 1982.

Volume I of this report includes trends by broad academic area within each degree level from years 1971 through 1982. It also includes trends in degrees awarded to blacks and to women for years 1976 through 1982.

Volume II contains trends in total degrees awarded by institution for years 1971 through 1982. It also includes 6-year trends (1977 through 1982) in degrees awarded for each program at every college and university in the State.

HIGHLIGHTS

Lower Division Certificates, which are awarded primarily by community colleges, have grown substantially since 1971. Contrary to trends in awards at other levels, there has been continued steady growth in the number of lower division certificates awarded in recent years. Almost all community colleges have experienced strong growth in awards at this level.

Associate degrees also are heavily concentrated at community colleges, although awards at this level are also made through the University of Maryland University College and some independent institutions. Among community colleges, there was a great deal of growth during the first part of the 1970's with relative stability since. UMUC also experienced a great deal of growth in associate degrees during the early 1970's. However, in recent years UMUC has restricted its associate degree program to active duty military personnel. Awards at the associate degree level in the independent sector, while relatively small in number, have grown steadily.

Bachelor's degrees increased by one-third at the campuses of the University of Maryland between 1971 and 1982. The State colleges and universities and the State's independent institutions experienced growth of slightly more than 20% during the same period. In the independent sector the growth during the past five years was somewhat lower than during the previous five-yeard period; among the State colleges, the growth during the past five years was considerably less than during the previous five years. At the University of Maryland, there was a 9% decline from 1977 through 1982, although most of this decline was due to decreases at UMUC.

At the masters level there was a good deal of growth between 1971 and 1982 in all three groups of institutions, although the pattern varied. The State colleges and universities increased their production of master's degrees by 47% for the 1971-82 period. During the first part of the period there was substantial increase while in recent years there has been a sizeable decline. At the University of Maryland, there was a slight increase in master's degrees awarded. The growth during the early 1970's was less than at other public institutions but so was the decline in more recent years. In the independent sector master's degrees more than doubled between FY1971 and FY1982. Most of the growth took place during the early 1970's with modest growth in recent years.

At the doctoral level, there has been relative stability at both the University of Maryland and the Johns Hopkins University.

At the Johns Hopkins University the number of first-professional degrees (medicine) awarded has changed very little since 1971. At the University of Baltimore there was considerable growth in professional degrees (law) in the early 1970's but stability since 1976. The University of Maryland's production of first-professional degrees (dentistry, law, medicine) also increased considerably during the early 1970's, but degree awards have been essentially stable since 1977.

*Data in this table are not strictly comparable to the summary tables by degree level included in Vol. I, as this table does not include data for institutions which are no longer operating in Maryland.

**University of Baltimore degree information is included in this category for the years during which it was a private institution. Data for Morgan and St. Mary's also are included in this category.
